

Vacancy Data analyst at Farminform

Are you a data analyst with a passion for finding insights in large amounts of data? Do you want to work in a dynamic environment where you can develop your skills and share your knowledge? Then this vacancy is for you!

You will work on various data analysis research projects, often together with partners. Partners can be research institutions, governments or industry. You prepare the data received from various sources and formats. The results of the research are reflected in data sets to be delivered, reports or possible scientific publications. You will contribute to innovations of the data analysis portfolio within Farminform.

About Farminform

As an independent data trust, Farminform has been providing accurate insight into the Dutch drug market for over fifty years. Collecting, enriching and providing (logistical) and usage data on medicines is Farminform's core activity. Farminform invests in sustainable partnerships with organisations that help healthcare providers use medicines appropriately and as efficiently as possible for their patients.

As users' data needs change, the current business model is being further developed and expanded towards an integrated model that includes both clinical and pharmaceutical data.

Job description

Your duties and responsibilities include:

Data Collection and Integration:

- Collecting and consolidating data from various sources;
- Integrating different data sets to get a complete picture.

Data Quality and Integrity:

- Monitoring data quality and proactively identifying potential problems;
- Implementing measures to ensure data integrity.

Data Analysis:

- Perform advanced analysis to identify trends, patterns and insights;
- Preparation of reports and dashboards for management.

SQL Querying:

- Mastering SQL to extract and manipulate data from databases;
- Optimising SQL queries for efficient data extraction.

Collaboration:

- Effective communication with different teams to translate insights into actionable actions;
- Collaborate with other analysts and stakeholders to promote synergy.

Desired Skills and Attributes

- Knowledge of SQL and experience working with relational databases;
- Knowledge of R or Python is an advantage;
- Experience with data visualisation tools such as Power BI or Spotfire is a plus;
- Strong problem-solving skills and analytical thinking skills;
- Ability to work independently and also collaborate effectively in a team environment;
- Good communication skills and ability to translate complex analysis into understandable insights.

We offer

- A varied and challenging job for 32 - 40 hours (0.8 - 1.0 FTE) in an inspiring working environment with a no-nonsense culture, short lines of communication and high level of ambition;
- An attractive salary;
- A working environment in Gouda, working hours are flexible
- An excellent package of secondary benefits including a pension scheme and training opportunities;
- Opportunities for substantive and personal development.
